

About Your NEARTA Diapers

Congratulations on your purchase of a set of NEARTA Cloth Diapers! If treated with a little care, these diapers will serve you well for as long as your baby needs them.

NEARTA Cloth Diapers are a complete rethink on the traditional cloth diaper. They use a unique combination of modern fabrics to provide superb comfort while standing up to repeated washing and drying. Their pioneering manufacturing process ensures quality while helping to make premier pocket diapers affordable. Their patent-pending design is nearly as easy to use as a disposable diaper while being as energy efficient to launder as a diaper that must be hand-folded prior to use. They have no needle holes to leak, and no dyes to trigger allergies.

NEARTA strives to be a good environmental citizen, and we believe we have the most environmentally-friendly diapers around in addition to being the most cost-effective. In that vein, please note that **the shipping container for this NEARTA Cloth Diapers Pack is itself a reusable wet bag**. It is likely that it has gotten dirty during shipping, though, so please wash it prior to use. It may be safely washed with the diapers themselves.

Do you like our product? Do you have an idea for making it better? Would you like to learn more about NEARTA? Visit us online at:

Instructions For Use

Ensure that there is (at least) one insert in the pocket of the diaper prior to use. More than one insert may be used to provide more absorbency as needed, and the positioning of the insert(s) within the pocket can be adjusted to provide more or less padding to different areas as needed. The pocket works similarly to a sandwich bag; no fasteners are needed.

For your baby's health, change diaper whenever it has been wet or soiled. (This applies to disposable as well as cloth diapers.) Putting a NEARTA diaper on a baby is just like putting a disposable diaper on a baby, although unlike most disposables the NEARTA diaper tabs may overlap if needed to give a better fit.

After use, for your community's health, flush any solids in your toilet (again, this applies to disposable as well as cloth diapers). The NEARTA diaper can be safely held in a diaper pail until enough diapers have accumulated to justify a diaper washing. Separate insert from pocket prior to washing and drying. The adhesive portion of tabs may be folded down inward to contact rest of tab in order to prevent them from clinging onto one another and tangling during washing and drying.

NEARTA diapers may be washed with ordinary detergent and even bleach. Many people prefer to use specially formulated baby detergents and will substitute things like borax or vinegar for bleach. Numerous cloth diaper washing tips and tricks can be found online; many parents keep individual cloth diapers in good shape through multiple babies. While NEARTA diapers are dryer safe, air drying will save energy and help keep them good longer.
